THE REDCLIFF REVIEW

THURSDAY, MARCH 23, 1933

Number 22

## Utilities Board Not Coming Here Until March 29

Will Meet Council And  
Ratepayers in Town Hall  
At Ten O'clock a.m.

The Town council has received word from the Utilities Board to the effect that its members will not be able to come to Redcliff on the date mentioned in our last issue. Their visit has been postponed until Wednesday, March 29th when they will meet the council in the town hall at ten o'clock in the morning for the purpose of discussing with them the town's financial affairs.

It is the intention to have representatives of the local industries and other taxpayers present to assist the council in picking the town's condition before the Commission.

## St. Mary's Society Has Successful Social

Was Held in L. O. F. Hall on  
St. Patrick's Day

The "whist" drive and afternoon tea were under the auspices of St. Mary's altar society, on St. Patrick's Day, was fairly well attended. The first prize for whist, a large jardiniere, was won by Miss Elsie Frey, and the consolation, a smaller vase, went to Mrs. B. Johnston. Mrs. E. J. Cooke held the lucky ticket for the draw on the lovely cushion. The fancy work and home cooking tables were well patronized. The afternoon was considered quite a success.

## Another Good Show Coming To Dreamland

The new Dreamland Theatre presents another big musical play this week end, "Compromised" featuring Ben Lyons and Rose Stewart, a thorough drama of a poor girl who married in riches. Also a thrilling Western, starring the Ace western star, Tim McCoy. This program is rounded out with a cartoon. The management also wishes to state that starting this Saturday with a Special Ladies' Program they will show Saturday matinees, only that special serial "The Last Frontier," a story dealing with the pioneer days.

Monday, Tuesday and Wednesday they are showing those well known comedians, Wheeler and Woolsey in one of their funniest features called "Caught Plastered." This program is rounded out with exceptionally good short subjects, namely: Ruth Etting in Bygones; Thelma Todd and Zasu Pitts in "Strictly Unreliable" and Pathe News.

Free Wedgewood & Co. Dinners given away to the ladies.

Coming soon Walter Huston in "American Madness"

Mr. Wyatt, manager of the Pithy Plant is moving his family to Redcliff in the near future, and will occupy A. N. Collard's house on Fifth street.

## Departmental Exams. Shortened This Year

Papers Are Now Cut From  
Three to Two Hours

No more will students writing departmental examinations be called upon to labor over three hour papers. The Department of Education has this year cut the writing time of examinations in all units from three to two hours with an extra half hour for revision. This will facilitate the marking of papers at Edmonton and examination results will be available somewhat earlier than in former years. Only students in grades ten, eleven and twelve are called upon to write departmental exams. Those in grades eight and nine are recommended for promotion by the principal of the school. Recommendations may be made on the results of the terms work or by means of final examination in June.

Last Year, all local students in grades eight and nine were required to write final examinations. This year, grade nine students will be promoted on the basis of the terms work, the doubtful students only being required to write final exams. All Redcliff grade eight pupils wishing to obtain a public school leaving diploma which carries with it qualifications to enter any Alberta High School will be required this year to pass final examination papers in June. This will be considered lenient by the school principal.

## C.G.I.T. Concert A Great Success

Well Taxed to Capacity to  
Accommodate Crowd

The concert given on Wednesday evening by the C. G. I. T. was considered by all present as a great success.

The program from start to finish was well rendered. The first half of the program consisted of a variety of numbers by the girls and the second half was a play entitled "The Bath Room Door," a comedy, in which the following took part: Mrs. L. Shimpin, Miss Allengbach, Mrs. J. Caine, Mrs. N. White, Miss Balmer, and Miss Blodwen Evans.

During the evening Mrs. J. Caine and Mrs. L. Shimpin were presented with handsome scarves as a token of appreciation of their untiring efforts in the successful production of the entertainment. Both leaders and girls are to be congratulated on the outcome.

The School room was taxed to capacity to accommodate the crowd and a tidy sum was realized by the girls as a result of their venture.

Mr. A. W. Woodcock, who has been suffering from a severe attack of the flu is now improving favorably.

Spring was ushered in Tuesday in a shower of rain. In fact it has been raining or making attempts to snow ever since. This looks promising for spring work.

## Redcliff Young Man Married on Saturday

Henderson — La Vene

A quiet wedding took place on Saturday afternoon, March 18, at 4 o'clock, at the home of Mr. Wm. Henderson Sr., when his grandson, Andrew Prince, was united in marriage to Miss Alice Alcxine La Vene of Redcliff. Rev. Mr. Pow performed the ceremony. After the ceremony, light refreshments were served and the wedding party left for Bow Island where a reception was held at the home of the bride's mother Mrs. J. La Vene.

Mr. and Mrs. Henderson will reside in Redcliff.

The Review joins in wishing the young couple a long and happy married life.

## TO INVESTIGATE BANKING SYSTEM

"The government proposes to appoint a royal commission to study the organization and workings of the entire banking and monetary system, to consider the arguments for and against a central banking institution, and make recommendations for revision of existing legislation. This was announced by Hon. N. Rhodes in his budget speech in the federal house last Tuesday.

## JUST FOR FUN

There was a young man of  
Siberia,  
Who of fasting grew wearier  
and wearier;  
Till at length with a yell,  
He burst from his cell,  
And devoured the Father  
Superior!

Father Ronald Knox

Mrs. Crooks, of Brooks, was the guest of Mrs. Rutherford over last week end.

Mrs. Gibbons, of Suffield, is the guest of Mrs. Scanlan this week.

Mrs. Moleux, of Drumheller, is visiting Mrs. T. Dutton for a few days this week.

By the addition of a fine new Chev car to his jitney service, Ted Van Wert will now be better prepared than ever to attend to the wants of his growing business. With two fine cars now in the service Ted will, in addition to his regular schedule between here and Medicine Hat, be prepared to accommodate the public for all kinds of side trips and special parties for dances, theatres, picnics etc. All orders will be promptly and carefully attended to.

On the first nine months of travel more than 100,000 pounds of mail were carried by air mail service in Canada. One-half of the service operates out of Montreal. Two other services are projected. One will cover the route from Anson to St. John's, and the second from the Peace River to North West Territories. There are 100 aircraft flying in Canada with 717 pilots, of whom 42 are commercial. There are 72 air bases.

At the annual meeting of the Canadian Automobile Association held in Vancouver, B. C., the Canadian Automobile Association was elected.

## School Softballers Win at Suffield

Local Lads Make Good Showing  
At First Game

The local high school soft ball team went to Suffield on Sunday and played a friendly game with the Suffield team. The game resulted in a 23 to 2 score in favor of Redcliff, a good beginning for the season.

As indicated by the score, the Redcliff team had the Suffield boys decidedly outclassed. Jim Lowens pitched a splendid game and Jack Cairns was the hero of the hour when he struck a home run with the bases full.

## Reduction Made In Auto Licenses

Is special Emergency Action.  
Not Permanent

Reduction of motor car licenses in this province on a flat \$5 basis to take effect Monday, April 3, was announced in the legislature Monday afternoon by Premier Bragg.

The cut will mean a loss of \$100,000 in provincial revenue from car licenses this year, but this will be partly offset by an increase of the gasoline tax from 5 to 6 cents a gallon.

The premier stated that the government had decided to make the reduction in car license fees as a temporary emergency action which, however, was not to be taken as indicating the policy in this respect in future years.

## BADMINTON NEWS

The following local players have entered the Southern Alberta badminton tournament now in full swing in Medicine Hat: Messrs. Jensen, Weeks, Pow, Simpson, Haygrave and Thomson.

Among the guests of the Medicine Hat badminton club on Saturday were noticed several Redcliff players, Messrs. Frey, McVale, and Silberman and Messrs. Thompson, Weeks, Pow and Simpson.

Among those from Redcliff attending the St. Patrick's Church concert in Medicine Hat last Friday evening were Mr. and Mrs. W. King, Mr. and Mrs. W. Campeau and Rev and Mrs. Stewart.

Guiseppi Zangara, the would be assassin of President Roosevelt, and whose bullet caused the death of Mayor Cermak of New York, and wounded four others, paid the supreme penalty in the electric chair, at Ralston Florida on Monday March the 20th.

There is considerable opposition throughout the province because of the amendments to the Public Utilities Act which it is claimed gives too much power to the Utilities Board regarding the control of prices on food products. Changes in the Debt Adjustment Act are also being criticized for the same reason.

## Badminton Social Was Great Success

Was Held in Club Quarters  
Last Friday

The members of the local Badminton Club were at home to their friends in their Club quarters last Friday evening. Each member had the privilege of inviting a friend and although the number present was not so large as had been anticipated a most enjoyable evening was spent. The first part of the entertainment took the form of a bridge party. The winners of the prizes were Miss Emma Frey and Mr. Leonard Hicks.

At ten o'clock dancing commenced and from then on joy was unconfined. Three of the club members, Messrs. Thomson, Schille and Simpson, supplied the music which combined with the variety of the program of dances and the happy temperament of the dancers, left nothing further to be desired to assure all a good time.

At midnight a dainty lunch was served and dancing was then resumed. The badminton club has been a real live organization since it started last fall and has made a real contribution to both the sporting and social life of the community.

Mrs. Timothy Eaton, aged 91 years widow of the late Timothy Eaton, the founder of the T. Eaton Co. Ltd. died at her home at Oakville Ont. on March the 19th.

All the Eaton stores from coast to coast were closed on Tuesday afternoon to honor the memory of the deceased lady.

## TRAIN SERVICE

West Bound, No. 1 6:01 p.m.  
East Bound, No. 2 8:45 a.m.  
No. 4, 10:27 p.m. Mixed due at 2 p.m. Thursdays and Saturdays.

## Churches

ST. MARY'S CHURCH  
Celebration of Mass every Sunday of each month except first Sunday, at 8:30 a.m.

GORDON MEMORIAL  
UNITED CHURCH

Pastor: Rev. B. Erickson  
Sunday, March 26th  
9 a.m. Church School.  
1st and 3rd Sundays  
11:15 a.m. Morning Worship  
Subject: "Why Unite With The Church."  
7:30 p.m. Evening Worship.  
Subject: "The Christian Church."

"The hope of immortality is the best of all hopes."

ST. AMBROSE CHURCH  
Rev. Malcolm Stewart, Vicar  
9 a.m. Holy Communion.  
10 a.m. Sunday School.  
1st and 3rd Sundays  
11 a.m. Choral Festival.  
2nd, 4th and 6th Sundays  
11 a.m. Mattins and Sermon.  
7:30 p.m. Evensong and sermon.

## New Taxation To Yield Sum Of \$70,000,000

Dominion Budget Estimates To  
Have Two Million Surplus  
Over Expenditures

The anxiously looked for federal budget was presented to the House last Tuesday by Hon. N. E. Rhodes, Minister of Finance. It outlined Canada's increased balance of trade but reported a deficit for the year of \$53,608,000 on the ordinary account and total addition to the Canadian debt of \$156,122,000.

The budget presented, estimated on the basis of present business conditions, is designed to produce in 1933-34 a surplus of ordinary revenue over ordinary expenditures amounting to \$2,000,000.

Revenues for 1933-34, under present taxation, are estimated at \$287,000,000.

Ordinary expenditures, are estimated at \$285,000,000. The deficiency on ordinary account is to be met by further reductions in controllable expenditures amounting to \$14,000,000, and new taxation yielding \$70,000,000.

The new tax list provides for a 12 1/2 per cent increase on income of corporations. Personal income exemptions will be reduced from \$2,400 to \$2,000. The new tax list provides for a 12 1/2 per cent increase on income of corporations. Personal income exemptions will be reduced from \$2,400 to \$2,000. The new tax list provides for a 12 1/2 per cent increase on income of corporations. Personal income exemptions will be reduced from \$2,400 to \$2,000.

A tax of five per cent, is imposed at the source on interest or dividends paid by Canadian debtors to non-residents of Canada effective April 1 1933.

A tax of five per cent is imposed at the source of all interest or dividends received by Canadian residents from Canadian debtors and cashed in a currency which is at a premium over par of Canadian funds; effective April 1, 1933.

The rate on sales tax remains at six per cent, as at present. All items now at half rate will be subject to tax at the full rate with the exception of articles for the blind. Special excise taxes are imposed as follows: Cosmetics for toilet preparations, 10 per cent; automobile tires and tubes, 8 per cent; cigarette papers, two cents per 100 leaves; cigarette tubes, 5 cents per 50 tubes; sugar 2 cents per pound.

On the whole it is quite evident that the increases in taxation are placed upon those who are best able to pay.

## NEW YORK LOSSES GRAIN BUSINESS

Shipment of Canadian grain to the port of New York for export is virtually at a standstill because of the restrictions of the Ottawa Economic Conference agreement withdrawing the Empire preference from grain shipped from one part of the British Empire to another, through a foreign country.

## ORANGE PEKOE BLEND

"Fresh from the Gardens"

## Welcome Announcements.

The recent statement by Premier Bennett in the House of Commons in which he outlined the attitude of himself and his Government on the subject of reciprocal trade relations with the United States, and in which he declared that the United States was Canada's natural market, constitutes, not only an announcement of great interest and importance, but it has the effect of removing, at least so far as the principle involved is concerned, this particular phase of the tariff question from the realm of partisan politics. Differences of opinion as to details of any such trade arrangement may exist or develop between the two great political parties in this country, but so far as the question of the desirability of such an arrangement, it has now been quite plain that there is no difference of opinion.

To all those who feel that the important question of the tariff should, as far as possible, be removed from the arena of partisan political controversy, this unanimity of view will be most gratifying, as well as a most hopeful sign that at no distant date a marked improvement in the trade relations of these two great countries, having so many things in common, and divided only by an imaginary boundary line, will be effected.

Premier Bennett has his momentous announcement when speaking to a resolution moved by a Liberal member, and which was worded as follows:

"That, in the opinion of this House, it is expedient that the Government of Canada re-open negotiations with the Government of the United States of America with a view of bringing about a satisfactory reciprocal trade agreement between Canada and the United States whereby the natural products of Canada, that is the products of the sea, the farm, the mines, and the forests, and including fish, lumber, wheat, cattle, etc., should have free entry into the United States, and the admission of certain goods from the United States of America, which in the interests of both countries may be admitted into Canada, free from customs tariffs."

Almost equal in its importance to Premier Bennett's statement, is the announcement contained in press dispatches that the new Administration at Washington, under the guidance of President Roosevelt, proposes to make overtures to the Canadian Government looking to the negotiation of such a trade agreement or treaty. If indeed, such overtures have not already been tentatively made.

Canadians generally will welcome these new developments, and nowhere will they be received with greater pleasure than in the provinces of Western Canada, which will attend such negotiations, than in the provinces of Western Canada. Unquestionably, the continent of North America is one economic unit, however it may be divided politically and nationally. Nature made it so geographically and climatically.

The United States can supply Canada with many things we do not, and cannot produce for ourselves—cotton, tropical and semi-tropical fruits, automobile coal, many articles of manufacture, to mention only a few items. On the other hand, the United States stands in need of enormous quantities of other natural products which Canada can supply in abundance. Why, then, should both countries erect barriers against the natural exchange of such commodities to the disadvantage of both?

Here in Western Canada we can raise tens of thousands of head of range cattle, but we are handicapped in marketing them for market, including the British market, and are at a distinct disadvantage in competing with the Argentine. But the United States raises enormous quantities of corn for feeding purposes. What is more natural than that Western Canada should ship thousands upon thousands of head of cattle to the south, and the south to be fattened for market? Both countries would profit thereby.

Why should the Maritime Provinces be forced to look for markets long distances inland in Ontario and Quebec, even in the West, with the rich markets of the great cities along the U.S. Atlantic seaboard right at hand and easily and cheaply reached by water transportation? Why should Ontario, lacking coal supplies of its own, be denied free and cheap access to the great coal fields of the south in the United States? Why should other country, crisscross the natural flow of trade north and south, fighting geography in an uneconomical fashion, while striving for markets thousands of miles away?

To it more admitted, almost universally, that the troubles which have beset the world are almost entirely of our own making, the result of cup of our blindness and stupidity, and not the fault of an all-wise Providence nor the breakdown of nature. If we are at a disadvantage in competing with the United States, the United States have set the world an object lesson. More than one hundred years of an undefined boundary line thousands of miles in extent. We have shown the nations of the world how international relations should be conducted so as to avoid all popular wars. Can't we not also show the world, in its present time of distress, how international economic relations should be governed so as to avoid economic warfare?

Assuredly we can, we will. And it is because we should do so, that these announcements of the past few weeks are so welcome, so promising, and better bet for the peoples of both countries. And to us in Canada, especially welcome as indicating a unity of desire and policy on the part of all our political parties in the advancement of the common good, and economic welfare of this Dominion.

## Canada's Shoe Industry

One of the Canadian industries to show increased production in 1932 was the leather boot and shoe factories. A correspondent "declared" that the shoe industry in 1932 produced in 1932 Canadian factories produced 1,879,218 pair, while imports totalled only 343,900 pair.

Great Britain has the highest tax on shoes, France second and Germany third.

A \$150,000 paper mill is being built at Eldersburg, England.

## Headaches and Dizzy Spells Nerves in Bad Condition

Mr. Hall Crawford, Hamilton, Ont., writes: "My nerves were in such bad condition I found it almost impossible to get a good night's sleep. I was almost bedridden with headache and dizzy spells."

"I tried many different remedies, but they did not seem to do much relief, but after I had taken Miltburn's Heart and Nerve Pills I was almost bedridden with headache and dizzy spells."

"I tried many different remedies, but they did not seem to do much relief, but after I had taken Miltburn's Heart and Nerve Pills I was almost bedridden with headache and dizzy spells."

## Electric Eye Records Activity Of Housewife

For each member of her family, the average housewife makes 18 trips a day to the kitchen sink, according to a February issue of the American Journal of Home Economics.

Each time she goes to the sink, the article shows, she spends, on an average, one minute.

Thus, the housewife, as a family of five will average 90 trips daily to the sink and will work there for an hour and a half.

A photo-electric eye was used to help record every trip made, together with the time spent at the sink. The U.S. Bureau of Home Economics was asked to make this study by the chairman of the committee on kitchen of the president's conference on home, building and home ownership, and it received outside co-operation.

An analysis of the study shows that the Washington, D.C., housewives in whose kitchens the photo-electric eye was placed, spent from 38 to 103 minutes of the week each day doing the number of trips varied from 32 to 217. The reasons for such variations were attributed to the activities, can be determined only by more detailed studies. The definite factual data, however, unavailable in such studies should make possible more definite conclusions as to the comparative efficiency of different types of kitchen arrangement. Dr. Stanley says.

## Rich Gold Strike

New South African Field Opens Up Great Possibilities

Another great gold strike—possibly equal to past rushes which helped to bring about depression—has been discovered in the American Institute of mining and metallurgical engineers.

One-fourth of the world's present gold production is the estimate, though not yet proven, capacity of this new field. The new field is located in the South African Republic, and was reported by P. W. L. Esterhuysen, geophysicist, geological engineer, geophysical section, United States Bureau of Mines, Washington.

One-fourth of the world's present gold production is the estimate, though not yet proven, capacity of this new field. The new field is located in the South African Republic, and was reported by P. W. L. Esterhuysen, geophysicist, geological engineer, geophysical section, United States Bureau of Mines, Washington.

## Robe Proved Good Maicoit

Girt Of Maicoit Chief Treasured By British Admirals

Admiral Sir Lionel Halsey, controller and treasurer to the Prince of Wales, told the Authors Club at London, England, of a New Zealand "kiwi" robe which he wore whenever he fought in action during the Great War.

The garment, a kind of kilt made of bat, was given him by a Maori chief when he was in command of the fleet cruiser "New Zealand." The "New Zealand" went on a cruise to the Dominion, One, after being sent over the ship, gave him the "kiwi" robe and asked him to promise that whenever he took the ship into action he would wear it. He told him that it had been worn by his forebears in war, but that it would never be required in that country again.

On August 28, 1914, when the action of Heligoland was fought, Sir Lionel said he wore the robe, the coming tower, and he added that the "New Zealand" never received a scratch during the fighting.

"After this the garment was looked upon as a mascot. On Jan. 24, 1915, when the ship was in the North Sea, a German ship, "Thetis," which was again he wore the "kiwi" with the same result, the "New Zealand" received no damage whatsoever.

In May, 1915, he left the "New Zealand" to Captain, later Admiral, Sir John Jellicoe. His successor, the "kiwi" to his successor and the British of the British Captain Jellicoe when it was the ship into action. Two ships in his own line were blown up and sunk, but the "New Zealand" received practically no damage whatever. After this, Sir Lionel added, the garment was returned to him, and it was one of his most treasured possessions.

## Another Use For Radio

Levers Machine Is Nerveless Treatment For Certain Diseases

A "lever machine" which treats disease by the power of radio waves to raise the temperature of the body was described by Dr. J. H. Brinnett, College of Physicians at Montreal.

It is a new application of radio, treating disease instead of sending messages, and was reported by Dr. Walter M. Simpson of Dayton, Ohio. The machine is used in treating diseases that are sometimes cured most often improved by producing artificial "fevers" in the body. Among these diseases are general paralysis, form of paralysis that attacks many important persons, some forms of arthritis, disease of the joints, and diseases that affect the bodily extremities—arms and legs, feet and hands.

The lever machine is a short-wave radio transmitter, which transmits 30-meter radio waves through the patient from large metal plates.

## Orient Buying Wheat

Shipments From Canada This Season Total \$4,841,171 Bushels

"Slightly increased demand in the Orient for wheat is indicated by the fact that Canada has shipped \$4,841,171 worth of wheat to China and Japan so far this season. This is 67,413 bushels greater than shipments at the same time last year, and it is believed that figures will exceed last year's mark by more than a million bushels.

Bookings up to the end of March for the Orient are 366,000 bushels. Only the lower grades are wanted, and Australia, near at hand, has been getting the lion's share of the business.

A Mark Twain story was young and struggling newspaper writer saw a lady of his acquaintance saw him one day looking at a shop window. The sign on the door read "Mr. Clemens." She said, "I always see you with a sign on your door, Mr. Clemens. I am afraid you are more too much." "It isn't that," said Mark Twain. "I'm moving again."

A machine in the coast and geodetic survey office at Washington, D.C., can predict the exact place in the world, at any hour, for distances to come.

**CHEST COLDS MECCA OINTMENT MUSTARD POLICE**

## EDMUNDSBURG

CANADIAN CORN STRIP

pure, wholesome, and economical table syrup. Children love its delicious flavor.

THE CANADA STARCH CO. LIMITED, MONTREAL.

## Art Competition

Manitoba and Quebec Student Architects Win Awards

Manitoba and Quebec student architects won awards in the Royal Architectural Institute of Canada competition, result of which were announced recently.

Leonard Desjardins, Ecole Des Beaux-Arts, Quebec, won first prize in the class "A" project, in which 53 designs were submitted, and Eric Thrift University of Manitoba, was awarded first prize in class "B" project. Forty-nine designs were submitted for the latter class.

Maurice Germain, Ecole Des Beaux-Arts, Montreal, won second in class "A" project; G. R. White, University of Toronto, was third, and William Sheets, University of Manitoba, received honorable mention.

In class "B" Lowell Wallace, University of Manitoba, was second, and I. M. Saunders, University of Toronto, third. The University of Alberta had two ships entered in the class "A" project and eight in class "B". It won no prize.

The jury of award consisted of: H. L. Preston, Montreal; Leonard Desjardins, Montreal; Wilfrid Levesque, Quebec; John M. Lyle, Toronto, and J. J. Burdon, Toronto.

**Aviator Was Popular**

Truck Fresh Vegetables To Arctic Miners In Severe Weather

Leigh Brinnett, president of Macdonald Brothers, Limited, was the most popular man in the Great West Lake mineral fields on New Year's day.

With the thermometer hovering at 90 below the zero mark Brinnett swooped down with a load of 300 pounds of fresh vegetables from Edmonton for mining men at the Eldorado holdings.

After a diet of canned goods and meat for several weeks the vegetables brought by Brinnett were a welcome addition to the larder of the hardy underground miners.

The Edmonton pilot's boat is that he made the long flight from Edmonton to Great Bear Lake, under most severe weather conditions, having a single head of lettuce or as much as a tomato frozen. A special helicopter, designed by Brinnett, was installed in the cabin of his machine.

## Stratosphere Plane

Fred Picard Believes He Can Build a Plane That Will Cruise Upper Atmosphere At High Speed

Prof. August Picard, explorer of spaces 100 miles above the earth, is convinced he can build an airplane capable of flying through the stratosphere, at 500 miles an hour.

The statement came in answer to a question by Dr. John Carruthers, secretary of the Los Angeles University of International Relations, as to whether the Swiss scientist thought he could construct such a plane if he were furnished \$500,000 for the purpose.

"I believe I could do so within a year and a half," he said. "In my opinion the stratosphere plane is a thing of the very distant future."

Professor Picard last August ascended to an altitude of 10,400 miles a special balloon, the experimental data on cosmic rays.

**Canadian Egg Inspection**

In 1931 the Egg Grading Service of the Department of Agriculture inspected 769,819 cases of eggs. In addition to the regular work of inspection by approval, the inspection staff makes approximately 40,000 calls annually on wholesale and retail dealers throughout the country. This is for the purpose of checking up on shipments of deliveries, the purchasing of material, receipt from producers and giving instructions and direction in candling and grading in accordance with the Canadian Standards.

A patent for a medical compound is obtained only in rare instances in the United States.

**Three-day count shows 4,000 homeless men, women and children in Cleveland.**

One of the most important of all developments in the last 37 years has been in sanitation and public health, affecting the lives of everybody. There were also diaphanous epidemics while malarial was not at all unknown in virulent form in many communities.

Sanitation has been by far the three phases to mankind—St. Catharines Standard.

**Appliance For Railroads**

Any sudden depression in a railway track is instantly detected and marked on a chart while the train is en route. This is a new appliance designed by an Australian inventor. It does away with the need of a daily inspection of the line.

**Appliance For Railroads**

## The Jig-Saw Puzzle

Demand In The United States Still Ahead Of Supply

Americans bought jig-saw puzzles to the amount of \$10,000,000 in 1932, an increase of 70 per cent. over 1931. More than 2,000,000 persons purchased interesting jig-saw puzzles that require real skill. More than 15,000,000 solved the simplest cut-out puzzles, stamped, not

## Predicts Many Earthquakes

Famous Seismologist Forecasts Disasters For Next Year

"A rather agitated year in the way of earthquakes, with especially great tremors in Alaska and the Greater Antilles, and a forecast for 1933 of Dr. Ruffalo, head of the famous seismologist.

"Known as 'the wonder man of Paenza,' Dr. Ruffalo, head of the Geodynamic Observatory of Paenza, is noted for the amazing accuracy of his seismic and volcanic forecast for the future. He forecast, for example, a quake in eastern America for early in March, 1929. On March 3 of that year New Yorkers noted prolonged earth shocks.

Although several important quakes are forecast for this year, in widely separated regions of the earth, Dr. Ruffalo states that the movements in the earth's surface will avoid shocky populated regions, thus preventing a repetition of the Messina and Tokyo calamities.

"In February in Alaska and the Greater Antilles, there will be an outbreak that will reach the proportions of an appalling manifestation," Dr. Ruffalo told International News Service.

"Throughout the southern chain of the Andes mountains, and in northern America in March there will be sudden threatening awakenings of dormant volcanic energy.

"To April the earth will tremble in far-away China.

"In May there will be had news from Mexico.

After that, he said, there will be some months of seismic quietness, when Valcan will come once visit one of his most famous stamping grounds, New Zealand.

"The Balkan peninsula will shake in September," went on Dr. Ruffalo. "Finally there will be a few quakes in Turkey and India before the end of the year."

## Remembered His Friends

Requests Left By Toledo Artist Provide Annual Birthday Gifts

Requests to be given to fifty-nine friends annually on their birthdays were provided for in an unusual will left for probate at Toledo, Ohio.

The late Frank J. Neel, art connoisseur, manufacturer and member of the old Toledo family, who died at 59, named seven friends as beneficiaries to be to receive \$200 a year on their birthdays as long as they live. The will also provided for gifts of \$100 each to fifty-two other friends to be distributed each year on their birthdays as long as they live. It was stipulated that the \$100 bequests were to be increased to \$200 a year as soon as the estate could afford it.

All of the beneficiaries live in Toledo except Beatrice Craigler of Hartstede, N.Y., who is listed among those who are to receive \$100 annually.

## Age Determined By Hair

Scientist Claims It Has Concentric Rings Like Trees

A method by which it is claimed to be possible to determine the age of a person by examination of a single hair was demonstrated before the convention of the International Association of Identification by Calvin Goddard, of the scientific criminal detection laboratory of North Western University at New Orleans.

The method depends upon the discovery that when powerfully magnified, the hair reveals a system of concentric rings something like the familiar rings of trees. This is the newest method of scientific detection.

## Working On Perfect Mirror

Science comes a step closer to the perfect mirror, one which will reflect every bit of the light, with a metal surface announced in the Physical Review by Hiram W. Edwards, of the University of California.

These mirrors, he says, should be of considerable value in various optical instruments where front surfaces of high reflecting power are desirable.

## All In The Same Boat

The farmers' interest could never be really divided from that of the towns. Both are now threatened with a common ruin, and the only hope of the one is the hope of the other. This is the increased demand which follows improved trade, and the improvement in trade, to be effective, must be world-wide.—London News-Chronicle.

A Munich professor has taught fish to respond intelligently to sounds and colors.

## BRITISH GOLF QUINTEZ AFTER NEW HONORS

Our picture shows the happy golfing quintet from the Mother Country who have arrived on these shores to compete in some of the major United States' women's golf tournaments. The British golfers, reading from left to right, are: Miss Kathleen Garrahan, Miss Diana Fitzpatrick, Miss Betty Dix-Perkin, Miss Owen Hartopp and Miss Barbara Pymon.

## Wanted To Conserve Trees

Late Frank J. Neel, Art Connoisseur, Manufacturer and Member of the Old Toledo Family

Frank J. Neel, who died in Paris a few weeks ago, was Canada's foremost advocate of reforestation. After retiring from active business about ten years ago, he set aside half his fortune for a one-man campaign to conserve the Dominion's "vast-wasting forest resources."

His death occurred when he was returning from Italy, where he had inspected Premier Mussolini's gigantic forestry system. He had gone to Italy on invitation of the chief of the country's forest service.

Wherever he went, whether to New York, London, Paris, the Hague or Berlin, he talked trees. Sometimes he became disgusted with the cold-blooded indifference of Canadians toward the slaughter of their forest and in days of these moods he decided to sell his vast holdings and leave the country because he had no desire to live in a treeless country, a condition which Canada is fast approaching.

## Englishman Fyles Challenge

Hubert Scott-Paine Will Race Garwood For Harmsworth Trophy

Hubert Scott-Paine, English motorboat designer and builder, considered by many England's leading speedster, has taken up the task of wrestling supremacy with the water from Garwood and filed a challenge for the Harmsworth trophy for 1933. The challenge was called to the Yachtmen's Association of America, which holds the trophy for Wood, through the Royal Motor Yacht Club of England. The race will be run at Detroit, Sept. 2, 4, and, if necessary, 5.

He will name his new boat Miss Britain III, and will power her with a 1,500-horse-power motor of the supercharged type used in the British 500-mile race. He is 35 years of age. He declined to reveal further details but said his hull would be a new and "unorthodox" design.

## Denied Double Income

Request Of Newly Married Swedish Couple

The time honored question as to whether two can live as cheaply as one may be applied to Swedish royalty. E. Wigforss, Finance Minister, declined to approve an additional allowance of 100,000 kronor (about \$20,000) to Prince Gustaf Adolf, who was married last October to Princess Stille, of Germany. The 26-year-old prince already had \$60,000 kronor a year, but his marriage, it is claimed, doubled his expenses. The total outlay for the royal family is reduced in the Wigforss budget by \$161,000 through cutting household expenses at the castle.

## A Real Handicap

Platform' orators assure that we shall pull through because our forefathers did when they plowed their country. We shall pull through, of course, but the argument is flimsy because the pioneers did not have to finance too many government projects, buy many railroads and too many high-salaries commissions.—Farmer's Advocate.

## Many Patents Issued

The Boston Transcript says in 1923 the U.S. Government issued eleven thousand more patents than in 1921—all for mechanical contraptions, and not one, apparently, for perfecting the nature of mortal man to fill him to use them wisely and for the benefit of the entire race.

More than 7,000,000 matches were made in Portugal last year.

## Canada's Tobacco Industry

Cigarettes Form the Main Item Of Tobacco Production

The most popular form in which tobacco is used in Canada is in cigarettes. The analysis of the tobacco manufacturing industry in Canada for the year 1931 has been issued by the Dominion Government Bureau of Statistics. It shows that in the year under review the total production of the industry was valued at \$14,038,182, a decrease of 1.5 per cent. compared with 1930. The item that goes to make up the aggregate value of the output was cigarettes to the number of 4,513,080,000 valued at \$12,025,121. The number is equal to about 476 for every man, woman and child of the population of the Dominion, and if placed end to end would extend approximately 190,000 miles or enough to girdle the earth more than seven times.

The next favorite smoke among Canadians is pipe tobacco which had an output of 17,070,000 pounds valued at \$1,888,920. Cigars, with a production of 1,055,412,000 valued at \$7,247,152, came next. Chewing tobacco, which was not generally indulged in as it was a generation or two ago, is by no means likely to pass into the discard any time soon. The output was valued at 20,065,440 pounds at \$4,612,085. The art or habit of snuff-taking evidently continues popular in the Dominion as the production in 1931 was 996,381 pounds with a value of \$1,192,000.

The Canadian tobacco industry consumed 33,989,546 pounds of raw leaf tobacco in 1931, 19,004,792 pounds was domestic origin. For the production of cigarettes 1,411,400 pounds of imported and 1,493,590 pounds of domestic tobacco were used; for the production of cigars 4,609,254 pounds of imported and 4,899,581 pounds of domestic tobacco were required, while for the production of smoking and chewing tobacco and snuff 7,148,736 pounds of imported and 12,415,623 pounds of domestic tobacco were used.

Foreign trade in manufactured tobacco is small compared with the domestic trade. In 1931, imports of cigars were valued at \$60,481; cigarettes, \$95,118; cut tobacco, \$424,025; snuff, \$13,316 and all other manufactured tobacco, \$181,185. Exports were even smaller. There was, however, an export of 6,687,801 pounds of unmanufactured tobacco, valued at \$2,018,802, most of which was shipped to the British Isles. Compared with the previous year there was an increase of 1,817,000 pounds in the quantity of raw tobacco exported.

## Gas Quota Proposed

Alberta Board Suggests Curtailment Daily Production To 200,000,000 Cubic Feet

Removal of all drilling restrictions with a daily gas quota of 200,000,000 cubic feet in Turner Valley oil field is recommended in the Alberta gas conservation board report recently issued. Companies would be allowed to drill new wells wherever they wish but production would have to be limited to the set figure of 200,000,000 cubic feet daily, according to the report which will be tabled in the Alberta legislature shortly.

The board report suggested the present restricted gas production in the valley be replaced by a proration plan as soon as convenient. Under this system, each owner of oil and gas lands within the productive area would have a certain allotment year with additional allotments, resulting when new wells come in, being met from those not in use or by an increase in the total daily output, if necessary.

Naphtha production in Turner Valley would be restricted to the output of 1933 if oil companies had not instituted government to the interpretation by some oil operator of a chart which accompanied the Alberta gas conservation report. Other oil men dispute this statement.

Germany Has Speedy Boat A boat has been built in Germany which will skim across the water at a great speed. It is driven by propellers in the air and the craft is fitted with exterior pontoons which will hold her steady in a rough sea. There is also a series of fin-like planes which will raise the boat almost clear of the water when under way.

A new electric iron, fitted with a handy heat indicator, shows at a glance whether the iron has attained the correct temperature for the articles ironed. It indicates the proper ironing temperature for various types of fabrics, cotton and starched materials.

## Garden Notes

(By Gordon Lindsay Smith)

Do not be fooled by the salesmen who offer you all sorts of "miraculous" seeds. There is a wide variety of seeds, and many of them are very cheap. A single seed may cost several dollars, and all of the same kind. Then, too, while the seeds may give wonderful results in the garden, they may also be a failure here. Reputable seed houses select their seeds with care, and they are not so much as to stock specially recommended seeds by this name and brand. If they do, they would not remain popular for so long. You may have perfect soil and take all your exercise with a hoe and rake, but you will not get seed you have a chance. Remember, too, that good seed is grown by experts who specialize on one or two lines and have space sufficient to prevent bad and other types mixing pollen and, therefore, strains and varieties indiscriminately.

When spring really arrives Canada enjoys the finest climate in the world for most vegetables and flowers. To get the most out of this period we really should start some of our vegetables and flowers from seed indoors. This may be done by starting the season without going to the garden. A hot bed is the best thing, though good results are obtainable by this means. The hot bed is made of straw or manure, and is covered with a glass or plastic covering. It is a good idea to start some of the early crops in a hot bed. The sides of the course, and the top, should be covered with straw. Allow the bed to heat up for a week and when it cools down to about 60 degrees Fahrenheit, start the seeds. An inch apart, watering carefully with a fine spray. The seeds should be spread over the soil to prevent the seed washing out.

If you are using a sunny window, follow the same procedure, only no heating is necessary. The seeds should be sown in a box three inches deep with two inches of soil. Then out when plants start to develop the second set of leaves, and when still bigger, transplant to the garden. The plants should be spaced only without the measure, or another method of spacing. The plants should gradually until the plants have practically outdoor conditions. Among the flowers, anything that is hardy, like Zinnias, Asters, Petunias, and so on, may be started in this way. The seed catalogue or a nursery will be glad to supply the seeds. The plants should be started in the late months before the stuff goes outside.

An early start is essential. Usually the seeds should be started in April when we can work a bit of soil. The seeds should be started in a box three inches deep with two inches of soil. Then out when plants start to develop the second set of leaves, and when still bigger, transplant to the garden. The plants should be spaced only without the measure, or another method of spacing. The plants should gradually until the plants have practically outdoor conditions. Among the flowers, anything that is hardy, like Zinnias, Asters, Petunias, and so on, may be started in this way. The seed catalogue or a nursery will be glad to supply the seeds. The plants should be started in the late months before the stuff goes outside.

## Would Increase Taxation

Move To Reel Taxation On Chartered Banks In Manitoba

The Manitoba Government will be petitioned to increase the taxation of chartered banks, according to a resolution passed at the annual convention of the Manitoba School Trustees' Association in Winnipeg. The preamble of the motion declares the banks have more in net profits more than \$200,000,000 for their stockholders during the year 1932, and the fair and equitable method of taxation is the taxing of those able to pay.

## Archaeological Discovery

The series of wall sculptures uncovered by Dr. Ernest Herzfeld under 36 feet of rubble and masonry of Persepolis, ancient Persia city, is considered the greatest discovery in the history of archaeology to date anywhere. The series of wall sculptures, if not together, would form a panel of five or six feet in height and almost 1,000 feet in length.

Shipping is the only method of ground transport in northern Siberia in winter.

## WORLD HAPPENINGS BRIEFLY TOLD

Possibility of using surplus farm crops of the United States for the production of alcohol is said to agriculture is being studied at the request of President-Elect Roosevelt.

George Bernard Shaw viewed the great wall of China from an aeroplane at a height of 8,000 feet, but had nothing to say regarding his experience.

Hon. Vincent Massey, former Canadian Minister to the United States, will be given the honorary degree of Doctor of Laws by McGill University, Montreal, at Convocation on May 25.

So many automobiles have been parked in Paris, where the municipality runs the parking, that a new garage to accommodate 2,000 cars is being built.

Alberta government does not favor appointing a commission to survey taxation, Premier John Brownlee informed a delegation from the Alberta branch of the Canadian Manufacturers' Association.

After many years' public controversy over the divorce question, the Chief Justice of Trinidad has granted the first divorce in the island's history. The hearing took only forty-five minutes.

John Robert King of Vancouver, prominent figure in the mining, fishing and lumbering industries of the Pacific Coast in pioneer days, is aged 80. He was born in Madoc, Ont., and came to British Columbia in 1876.

Prof. August Piccard, explorer of spaces 10 miles above the earth, is convinced he can build an aeroplane capable of flying through the stratosphere at 200 miles an hour. It is being furnished \$500,000 for the purpose.

The Japanese Government through the embassy at Washington, issued a 6,000 word statement in defense of her military activities in Manchuria and her actions at Canton in the face of condemnations on the part of the League of Nations.

## Fish Cargo By Air

**Former Two-Day Trip Now Takes Half An Hour**

Within half an hour after whitefish are caught in the lakes of northern Manitoba they are delivered to a point by aeroplane on the Hudson Bay Highway, 35 miles away, for transit from this point by rail to cities in Canada and the United States where they are in demand. Formerly the 35-mile journey by horse outfit and tractors took two days over rough trails.

The inland fisheries of Canada are among the country's most valuable assets. The fish caught in large quantities for the commercial market in Manitoba come from Lake Winnipeg, Lake Winnipegosis, Lake Manitoba and the smaller lakes. White fish and pickerel are the chief fish caught, but pike, tullibee, gold-eye and several other varieties are plentiful.

It is strange that many of those diarists who profess the destruction of all culture by machinery use the radio to broadcast their fears, read their speeches from a typewritten manuscript and then ride home in a taxi.

**"Vegetable Compound"**

It steadies the nerves and helps to build you up. You are just better... sleep better... look better. Life will seem worth living again. Remember that 98 out of 100 women say, "It has helped me." Let it help you, too. Liquid or tablet form, as you prefer.

W. N. U. 1964

## Artists Very Seldom Have Beautiful Hands

**Captain But Not Decorative**

The idea that hands exhibit more character than face, and that artists' hands are invariably soft, slender and graceful, is nothing but a myth and a delusion. Mrs. Alma Reed says, "Mrs. Reed opened an exhibition in New York of more than 150 photographs of hands of famous men and women, actresses, prizefighters, writers, painters, politicians and housewives."

"The hands of famous actresses," she said, "are almost universally beautiful. Long, slender fingers, meticulously cared for nails, and smooth contours are characteristic. Their hands are decorative, as they should be. But when it comes to musicians, writers, sculptors, male or female, the rule does not hold. Their hands are apt to be strong—capable, yes, but not necessarily beautiful."

## Pulp and Paper Industry

**Operated On Sound Economic Lines**  
It would require a long time to "When prosperity returns, it should be the task of both Government authorities and those who direct the destinies of the pulp and paper industry to work for an effective control of development, in order that the overproduction may be avoided and the industry allowed to expand in response to normal demand not to artificial stimulus. If it is thoroughly rehabilitated and operated on sound economic lines, there is no reason why it should not regain its former place, but danger from the American shippers is written plain—Montreal Star.

## BABY'S COLDS

**Never "dose" except on doctor's advice**

**John W. VICKS**

**BEST FOR ADULTS TOO**

**Recipes For This Week**  
(By Betty Barclay)

**LUNCH BASKET PINWHEELS**

1 cup flour.  
2 teaspoons baking powder.  
1 teaspoon salt.  
1/2 cup milk.  
2 tablespoons sugar.  
1 tablespoon orange juice.  
Grated orange rind.

Mix and sift flour, baking powder and salt, rub in one tablespoon butter, or other shortening, and moisten with a dough with milk. Roll thin, spread with remaining butter, sprinkle with remaining sugar, and bake in a hot oven.

**HAM MOULDS**

1 cup cooked ham, chopped fine.  
2 tablespoons butter.  
1/2 cup stale bread crumbs.  
1/2 cup milk.  
1 egg.  
1 teaspoon sugar.  
Salt and pepper.

Melt butter. Add bread crumbs and milk. Cook five minutes, stirring constantly. Add ham, egg, slightly beaten, and seasonings. Pour into buttered custard cups. Set cups in pan of hot water. Bake in a moderate oven until firm. Serve with a white sauce.

**World's Brains Still Busy**

**Someone Is Always Thinking Of New Things For Invention**

In 1840, a current magazine article reveals, an official of the United States patent office resigned because "everything possible had been invented."

Since this gentleman left his post in the snug belief that the world was a finished product, the world's brains have invented the sewing machine, the typewriter, the electric locomotive, the air brake, wireless telegraphy, internal combustion engines, airplanes, cash registers, incandescent lamps, motion pictures and about a million and a half other devices which we now consider commonplace.

Milton sometimes has had more than 300 words to a sentence in his writings.

## Price Of A Newspaper

**Cost Of Production Much More Than Readers Pay**

A valued subscriber to the Globe has raised a point which, perhaps is in the minds of many people when he asked why the price of newspapers remains the same as before the drop in general price levels.

Many readers realize that the small amount asked for a copy of a daily paper bears no relation to the cost of producing it. It is merely a nominal sum, which in the case of a paper like the Globe, does not pay for the cost of the white paper used. It is unnecessary to refer to the cost of handling, delivery and postage, or to the fact that it carries news costing thousands of dollars to collect.

The *Simcoe Reformer* recently illustrated the difficulties under which newspapers in general are operating by reciting weeklies which have ceased publication and others which have reduced their size. "Such instances as these," it comments, "should go far toward dispelling the idea that newspaper publishing is less than the average business. As the *Bowmanville Statesman* remarks, this false impression may be due to the high standards being maintained by the newspapers to create that optimistic character which is the life of the fact is that the publishing business is among the hardest hit."

Despite that fall in prices all around, the newspaper is still the leading thing on the market.—*Toronto Globe*.

## A Featherweight Airplane

**Slow-Moving Machine Is Remarkably Easy To Handle**

Britain sees remarkable results achieved with a slow-moving, featherweight airplane. This new type, which may indicate the coming of "flying for all," is designed by C. H. Lowe Wyde. A woman beginner requires a night after half an hour's instruction, the instructor giving his orders from the ground. After three hours in the air the pupil was able to pass the tests for her "A" certificate.

The plane carries only a 4-horse power motorcycle engine. Its top speed is 50 miles. But the big factor is the 12 knots at the "stall" speed of 15 miles an hour.

## Looking After Draft Horses

**Soviet Plan Variations and Fatening Diet Before Spring Work**

Millions of horses in the Soviet Union will receive long vacations and special fattening diets under government orders issued for the reconditioning of draft animals before the spring grain sowing. All horses are to be examined. Weak animals will be relieved of work. Horses in the principal grain regions, regardless of their health, will get three weeks' vacation before sowing begins. High mortality among horses due to overwork and undernourishment is responsible for the new orders.

Although cooler than the outside air, the interior of the Great Pyramid of Gizeh is excessively hot due to lack of ventilation.

Things don't seem half as expensive when you can change them.

## CORRESPONDENCE.

**TO STAMP OUT DEPRESSION**

The Editor—In your issue of Feb. 25, Mr. C. H. Lowe Wyde, of England, lines his plan to stamp out the depression.

Many plans might be devised to remove the present unfortunate economic conditions, caused by the depression, as the one suggested by Mr. Burnell, but the difficulty in each case is to have them adopted.

Mr. Burnell believes that our present economic conditions are the result of the fact that, he states his belief in the existence of a depression, and implies that it is obsolete.

The system we have, however, deteriorated, if operated intelligently, would bring us out of this morass, without any further complicated schemes.

Mr. Burnell's plan commences with the appointment of a number of officials. These officials would buy "cash tickets" for double their face value, giving in exchange "certificates," which would again be exchanged for real cash, after stamps, bought from these officials for real cash, had been affixed to the "certificates," raising its face value to six per cent above its original face value.

That charge of six per cent might prove expensive to the government, or officials, or it might not. Some present government would have to stand the cost of the plan.

The present currency system would remain the same, but the exchange of coins, bank notes and private currency would still be the same. The producer seller would be glad to get a piece of new currency of a face value of one hundred per cent, higher than the price of his produce, those who have cash, and those who have cash, would be less eager to take it, having to purchase a stamp to make it good. Business men, however, would prefer real cash.

As people are in short of real cash, from where would the supply of real cash come with which to purchase the stamp?

Mr. Burnell states that this system is already in operation. He has quoted the opinions of those who have used the system. Dr. J. H. Fisher is said to have approved the plan. As a matter of fact, this plan is a suggestion of the author, offering as a solution.

There would appear to be one real difficulty. When a storekeeper was offered a stamp, he would be inclined to offer his customer one of those "certificates" as part of the price. The stamp would be "certificates" would have to total up the value of the stamps offered in exchange to determine the present face value.

With this plan it is generally supposed that the stamps would be fixed at stated periods, one each week, a guarantee that this money should circulate. In that case, if the stamps were issued at intervals of fifty times during the week, it would not be fair that the last stamp should be issued at the end of the week.

The "certificates" would be almost worthless, as they would be fixed at the banks in deposits. Would the banks be expected to accept them as part of their business?

Mr. Burnell says his plan also embraces the principle of retaining currency to the government. Currency is always based on the exchange of all currencies at a standard value. It has been, always must and will be.

It is hoped that Mr. Burnell will excuse some of the criticism of his plan, and will attempt to simplify the plan.

There are far simpler plans to escape from the present economic depression. The human race would not be able to perform the same work as it is now doing. —C. C. Stuart, Bruno, Sask.

## Tired Of Depression Talk

**Woman Mining Recorder Returns North Where People Do Not Grumble**

Tired of talk of depression which she has continuously encountered in the cities, Mrs. P. Muncester, British Columbia's only woman mining recorder, started the return to Squaw Creek, near the boundary of the Yukon and Alaska.

"At Squaw Creek," she says, "things were never exactly prosperous, but folks take things in their stride and never grumble. Why, they don't even know there's a depression. Things go on just the same."

Mrs. Muncester took in a team of sleigh dogs and supplies and she plans to make the trail to Squaw Creek before the ice thaws. Her goal is reached by way of Haines on the United States side and Pleasant Valley, a former Mountied Police post.

"As a matter of fact, conditions are better at Squaw Creek now than ever before," says Mrs. Muncester. "Most of the people are trappers, with about one white man to five Indians. There's not much money in it for three days, but gold was discovered over there long ago and the miners are making from \$8 to \$15 a day in some places, with absolutely no place to spend their money."

The British House of Commons once adjourned to sit 11-year-old William Betty, boy prodigy, play in Hamlet. Betty could master the heaviest Shakespearean parts with ease.

Although it is a bird, the New Zealand kiwi cannot fly. Its feathers are incomplete and have the appearance of coarse hair.

## Avoid Grippy Colds

Take Vitamin-rich

**SCOTT'S EMULSION**

of Norwegian Cod Liver Oil

To Build Resistance Easy to Digest

**Offers Great Possibilities**

**Diesel Engine Travels Quickly With Small Amount of Fuel**

Flashing over the rails at 65 miles an hour, the first Diesel electric train ever used on a British main line had a successful trial on the 113-mile run from London to Birmingham.

Five minutes' ash, puffing clouds of smoke and steam, sped the regular London-Birmingham flier, but the Diesel train traveled just as fast and purged along smoothly and almost noiselessly. It required only 25 gallons of fuel, costing a total of seven shillings, about 11.5 at current exchange) for the journey.

The trip opened startling possibilities for the hard-pressed British railway companies, which have been keeping to steam for a century because of the cheapness of British coal. Recently the Southern Railway tried a new departure, electrifying the main line from London to Brighton, but at a heavy initial cost and after three years' work.

Not only is the coal industry worried by the success of the Diesel train but the advocates of electricity are beginning to wonder whether the Diesel storage battery system is not better and better fitted to local conditions.

## Made Punishment Fit Crime

**Chairman Of Blue Star Line Had Ideas About Justice**

Lord Vestey, the venerable chairman of the Blue Star Line, who is celebrating a 74th anniversary, has a decided and exquisite notion of making the punishment fit the crime.

Some time ago his gardener brought two boys to him who had been caught raiding his garden. "They," Vestey confessed their crime. "Very well," said his lordship, "I shall make an example of you, James; take these boys to the police station and let them see outside apple dumplings—and see they eat it!"

## King George Will Officiate

**South Africa House To Be Opened In London**

The opening of St. Africa House, the new London headquarters of the South African Government, will be performed by the King April 11. It is the fourth great Imperial building erected in London, Australia being opened in 1911, Canada House in 1923, and India House in 1930. Trafalgar Square is much improved architecturally by the new building, which is richly decorated internally with hardwoods and marble brought from the Cape.

## Hopes To Better Record

**Speaking at a testimonial dinner given in his honor, Sir Malcolm Campbell, who established a new world automobile speed record of 272 miles an hour, said he was hopeful of returning to Daytona Beach, Florida, next year from South to try for a 300-mile-an-hour mark.**

## Drifted Many Years

**A bottle containing a card of the hydrographic department of Japan was found on the beach a mile south of Tillamook Bay, C. L. Barlow, Oregon. The bottle was sealed with wax and was contained a card indicating it had been set adrift June 6, 1911.**

## Wholesale Commodity Prices in Japan Have risen 30 per cent in the year.

## THAT DEPRESSED FEELING IS LARGELY LIVER

**Wake up your Liver**

**WILLIAM LACONEL**

What you are feeling now is simply because your liver is not working properly. Depression and dissatisfaction are the result of a sluggish liver.

When you need a liver stimulant, remember that the only one that is safe and effective is the one that is made by a doctor who has been a doctor for many years.

Dr. W. L. Connel is a doctor who has been a doctor for many years. He is a doctor who has been a doctor for many years.

## World Trade of Britain Continues To Expand, Despite Existing Conditions

Undeterred by adverse world conditions and by the prolonged period of difficulty through which it has passed, industrial Britain goes steadily ahead receiving and filling orders for foreign account, often in the face of severe competition from other nations, and thus continuing to build up Britain's reputation as a centre for the production of superior manufactured articles in widespread demand.

Of decided interest to Canadians is the announcement made by representatives of the Welsh tinplate trade of a record order from the American Can Company, operating works in Montreal and Vancouver, for a million boxes of tinplate valued at \$700,000. The firm receiving the order controls 20 tinplate works in South Wales, in addition to six iron and steel plants, and already the effects of the contract are being felt in increased activity in local industrial circles.

A Manchester plant has recently completed a contract for eight heavy-mixed-traction locomotives for service on the Chinese Government railways and the locomotives fully erected have been shipped in a vessel specially equipped for such consignments. Locomotives of this description have been supplied to China by United States firms in the past.

Four oil-electric locomotives, the largest yet produced in Europe, are about to be shipped from the Armstrong, Whitworth works near Newcastle-on-Tyne to South America for use on the Buenos Aires Great Southern Railway.

Two engineering firms are reported to have jointly secured a contract for gasoline storage tanks which are to be erected at Haifa, Palestine, for the Iraq Petroleum Company. The contract, Industrial Britain reports, is worth \$160,000 and was secured in the face of world-wide competition.

From Durham county come word of the receipt of orders from Czechoslovakia and Holland for steel-casting equipment representing a total value of more than \$40,000.

Orders from Persia for textile machinery to the value of \$40,000 have been received by Lancashire firms. These orders follow the announcement that the Shah of Persia has given instructions that the machinery for a number of spinning and weaving mills that was sent to establish in that country must be ordered from Great Britain.

Another big contract has been placed by the Russian trade agents with a Manchester firm for a railway axle plant which is to be installed by the Soviet Government with an annual output of 270,000 axles. The same firm has recently completed a large Russian machine tools order, and the latest city word indicates the face of severe competition from Germany.

A Bolton concern of machine-tool makers reports the successful conclusion of negotiations with Canadian buyers for various types of tools formerly purchased from the United States. The order, it is stated, runs into thousands of pounds in value.

Thus, in hard times as well as in good times, the British industrialist goes steadily forward capturing orders for the provision of machinery or other articles to foreign countries, notwithstanding severe restrictions imposed by other nations. His business surmounts tariff and other barriers and the world continues to be his market. That he is enabled to receive his due share of foreign orders is principally due to the quality of his output, for it is universally recognized that British goods are satisfactory goods and in spite of great temptations, the British industrialist has consistently declined to put an inferior article on the market.

Those who are accustomed to argue that Britain is dead industrially and otherwise fail to take into account the energy with which the British manufacturer continues to seek an outlet for his goods and the markets in which those goods continue to command, on account of their inherent quality, in spite of world conditions in world trade.

Could Say Plenty

"Did you ever have a telephone ring when you were in the bathtub and there was nobody at home?"

"Oh, yes," replied the family man.

"What did you do?"

"Well, I play a little golf, and I have also made a few remarks to a flat tire, so draw your own conclusions."

W. N. U. 1084

### Rice Growers Face Ruin

Empire Agreements Have Destroyed Trade For British Guiana

About 150,000 of the inhabitants of British Guiana are faced with ruin as a result of the Empire trade agreements reached at Ottawa, according to advice received at Port of Spain, Trinidad, viewing the views of the Demerara Rice Marketing Board. Guiana formerly had a preference for its rice in the British market, but under the Ottawa agreements India gets the same rates and has been driving out Guianese rice. An appeal has been made to London for protection of the former market, but the authorities have been informed that no discrimination can be made. About half the population of Guiana is dependent on rice growing.

### Street Purposes Have Changed

New Planning Necessary Opinion Of President Of British Architects  
London hears a novel analysis of modern street traffic problems by Sir Raymond Unwin. The president of the Royal Institute of British Architects says street purposes have entirely changed. We run what are practically locomotives at locomotive speed on highway meant for horses and pedestrians. A complete new planning must come. It will expel traffic from streets on which it is to stop, and will ensure safety of adults and children on foot. The pedestrian will move leisurely in parallel streets which will have shops but no motor traffic—Christian Science Monitor.

### Winnipeg Newspaper Union

By Ruth Rogers

Four years ago when some of the old masters belonging to the estate were sold, a Reynolds' portrait alone fetched 3,000 guineas (about \$15,000 at par). Today 50 portraits realized a total of little more than a tenth of that sum.

Portraits of such half-forgotten painters as Lely, Kneller, Hudson, Hobday and Joseph were put up on one day, bringing about a pound each. Four portraits by Blatter, including one of Spencer Perceval, the murdered premier, brought only 12 guineas. Others followed at an average price of 12 guineas a dozen.

At the close of the sale, the portrait of a young man in a military uniform, which was sold for 10 guineas, was the only one of the lot to be sold for more than a pound.

## THE REVIEW, REDCLIFF, ALBERTA

"Here I sit, scared to death, and too darn lazy to run."—The Passing Show, London.

### Need Paid Hunters

To Protect Game In Northern Manitoba From Timber Wolves  
With timber wolves increasing in numbers and few pets being brought into the P.A.s for bounties, northern Manitobans say that the only way to save the game in the Moose Lake country, will be by means of at least two paid hunters. It is learned at The P.A., Manitoba, that only 54 timber wolf pelts were brought there for bounty last year. This does not represent the total number killed, though it had been killed by wolves. It had been chewed slightly at the throat. Lamb marked the spot intending to bring the deer to The P.A., where he intended to place it on exhibition. On returning a couple of days later, he found the passing Indians had taken part of it for dog food.

### Bring Low Prices

Portrait of Earl of Egmont's Family Are Auctioned in London, England  
Nearly 50 of the Alberta rancher Earl of Egmont's family portraits were sold recently at Christie's famous auction parlors in London, England.

Two years ago when some of the old masters belonging to the estate were sold, a Reynolds' portrait alone fetched 3,000 guineas (about \$15,000 at par). Today 50 portraits realized a total of little more than a tenth of that sum.

Portraits of such half-forgotten painters as Lely, Kneller, Hudson, Hobday and Joseph were put up on one day, bringing about a pound each. ### Rapid Growth Of Insanity

Psychology Professor Claims Canada and U.S. Lead World  
Canada and the United States in equal per capita, are leading the world in numbers of insane, according to Very Rev. Canon Charles Varley, professor of psychology and psychiatry at the State University of Amsterdam, Holland, who called from Saint John after completing an independent study of psychiatry cases in North America, during which he was attached to the Church of Our Lady of Victory in Saskatoon for two months.

The rapid growth of insanity is due to a large extent from the depression with its resultant financial worries and the like," said the eminent alienist. "The fact of this country and the United States is also one of the main causes. Young girls are not heeding the demands of health. They stay up late at night. Get little sleep and rush off to the office heedless of breakfast. It just can't be done."

### Honor Madame Albani

Marble Bust Of Famous Prima Donna For Quebec Provincial Museum  
A marble bust of Madame Albani, famed prima donna of the opera at the turn of the century and one of the greatest artists French Canada has given to the world, has been offered to the province of Quebec by her son, Ernest G. Albani, in London, England, through L. J. Lennox, Quebec's commissioner there. The bust is the work of Prince Holmboe and will be placed in the provincial museum at Quebec. It was announced by Premier L. A. Taschereau, who called his thanks to Madame Albani's son. Madame Albani was born in Chambly, Quebec, near Montreal, in 1847, and died March 5, 1909. She was invited to sing before many European courts following her operatic debut in Massena in 1870.

### Ask Federal Assistance

Need Aid In Maintaining Medical and Hospital Care in Saskatchewan  
Federal assistance in maintaining necessary medical and hospital care for people of Saskatchewan was urged at Saskatoon at a special session of the Saskatchewan Medical Association. Fifty doctors from districts all over the province attended. A resolution was passed calling for "the joining of hands on the part of medical services, hospital services and the Rural Municipality Association in a proposal to the legislature of Saskatchewan for further consideration from federal sources, through the medium of the department of national health, to assistance in maintaining necessary medical and hospital attention throughout the province."

Tobacco exported from Cuba in a recent month was valued at \$1,139,687.

### ROYAL COMMISSION TO ENQUIRE INTO NEWFOUNDLAND'S FUTURE

Above are the three members of the Royal Commission appointed to report on the economic situation in Britain's oldest colony, Newfoundland. Left to right, Hon. C. A. Magrath, Canada, Lord Amherst, Great Britain, and Sir William Statten, Canada.

## Celestial Phenomena Will Present Many Points Of Interest To Star Gazers This Year

A Wesley Letter

Great Preacher Gave Counsel On The Subject Of Marriage

A letter from John Wesley to a correspondent who had apparently asked the great preacher for counsel on the subject of marriage was sold at Sotheby's in London, England, for \$120.

The letter is addressed to "Mr. Peter Garforth, at Skipton-in-Craven, Yorkshire," and its contents are as follows:

"My dear brother: A person with all the qualifications you mention is not every day to be met with. I do not recollect such a one at present. I will meet with or think of one. I will send you word. I advise you not by any means to entangle yourself with a predestinarian. A sensible, well-tempered woman, fearing God though not much awakened, is far preferable. Wishing you may have light from God in that and all things, I am, your affectionate brother, J. Wesley."

### Encouraged Flower Farming

Prince Of Wales Hoped Miners In Duchy Of Cornwall

The Prince of Wales has been obliged to cancel his proposed visit to the Isles of Scilly. Had he been able to keep the engagement his arrival in the Isles would have been a great event. The Prince is a keen flower grower, and he would have seen the great strides made by those engaged in the bulb industry. The output is greater than ever before. Consignments for market number as many as 5,000 boxes of flowers a day. At the time when the distress among unemployed miners in the Duchy of Cornwall was at its worst, and almost all the flower growers were unemployed, the Prince showed practical interest in their predicament by placing at the disposal of several families holdings in the Duchy and by supplying the necessary implements and bulbs to enable them to take up flower farming.

### A Custom Of The Sea

British Ship Now Whaling When Fishing Island Near Queensland

Whenever a British ship staming along the coast of Queensland passes between a certain island and the mainland, she blows a prolonged blast on her siren. The story begins years ago, when a young Englishman engaged on exploration work in that locality had a narrow escape from losing his life. He was rescued just in time by a native girl, who, to save his life, had to swim with him across half a mile of shark-infested water. The young man married the girl, and they settled on the island. Then, one night, a British vessel was wrecked there, and it was only through heroic efforts by the man that his crew were not lost. He has since died, but the wife and family still live upon the island, and it is to them that the brave act is still remembered that every British ship sounds its whistle as it passes.

Increased difficulty for women in California has been declared by some companies. They have declared that their employees must be called "ice attendants." They must dress in white uniforms with brass buttons and carry the ice in stout black waterproof saddle.

A bore is one who has nothing to say and keeps on saying it.

The sky schedule for 1933 will be the great interest to star gazers, according to the American Astronomical Association.

Six perihelion comets are due for return engagements. Two eclipses of the sun are in the schedule also. Then there are many other points of more popular interest. This is other planet because of its possibilities as an abode of life and its fascinating and varied surface movements which indicate seasonal changes, came to perihelion on March 1.

Perihelion is that point of the orbit of a planet or comet which is nearest to the sun. This is one of the less favorable oppositions, since the planet is 62,000,000 miles distant from the earth at nearest approach on that date.

Nevertheless astronomers interested in the physical phenomena of the planets are keeping this little neighboring world under scrutiny for some time. Then there is a small object more than usual except to hear planet Mars within the next few months.

The comets returning are Brown, Pons-Winnecke, De Vico-Swift, Graccholi, Finlay and Holmes. The first was last seen in 1879 and is due to appear to perihelion again in November.

The Pons-Winnecke comet has a perihelion of 1819. It is due to return again in May.

Graccholi's comet was discovered by that astronomer in 1861. It is due to perihelion in June. Finlay's comet is also due in June. Holmes' comet was discovered in 1902. It is due in August.

There will be two eclipses of the sun, both annular. An annular eclipse is one in which the relative positions of sun and moon are such that the moon falls completely to cover the solar disk and there is a thin annulus or ring of light surrounding the dark lunar disk at the time that would correspond to mid-totality of a solar eclipse.

The first eclipse occurred on Feb. 24. The partial phase was visible in the southern and central part of South America, all of Africa, except the extreme southwestern part, the western part of the Mediterranean, Greece, Asia Minor, Persia and Arabia.

The next eclipse will occur on Aug. 21. The partial phase will be visible in central Europe, Europe and northeastern Africa at sunrise, later in the morning, or near mid-day, in Siberia, central and southern Asia, and the eastern part of the Philippines and East India.

### Status Of The Metis

Government Spokesman Says Half-Breeds Not Wards Of Dominion

Half-breeds are not wards of the Dominion Government, said H. C. Murphy, head of the Department of Indian Affairs. Half-breeds were situated in the United States when they lived, he said, with the same rights and responsibilities as the whites. Their care was a provincial matter.

In the Alberta House it was stated that half-breeds in that province were impoverished. Premier J. E. Brownlee said it had not been decided whether the Dominion or provincial administration was responsible for the care of the half-breeds. It might be necessary for the courts to decide.

The pure-bred Indians are wards of the Dominion Government. They are not the wards of the white citizens. The Dominion Government is responsible that they do not suffer want.

### Australia Using Own Currency

A train of ten cars loaded with English silver, from all parts of South Africa will be sent to the mint in Pretoria within a few weeks. The shipment will be the result of a decision by the Union of South Africa to use its own currency. The total to be withdrawn is estimated to be the equivalent of \$4,250,000, but the intrinsic value of the silver is less than \$2,000,000. The total number of coins to be withdrawn is between 150,000,000 and 20,000,000.

### Auto Exports Increase

Increased sales of Canadian automobiles abroad in the bright spot noted in the February business summary issued by the Bank of Montreal. Greater sales were attained abroad throughout the whole of 1932 and January's figures reflect expansion of the foreign market is continuing.

## A HEALTHY SIGN

One of the most important matters which have come before parliament at the present session is the railway problem and the consideration of the Duff Commission's report.

The bill introduced in parliament is designed to solve the difficulties under which the railways are struggling, and it is based on the recommendations of the Duff Commission to investigate the transportation problem last year. The bill provides a new form of control for the Canadian National Railways, three trustees, instead of the present board of directors, and sets up machinery for compulsory co-operation between the Canadian National and the Canadian Pacific in the interests of economy.

That the Bill is being seriously considered by a large percentage of the members, irrespective of party leanings, may be presented from the result of the vote on its second reading last week-end, when seven Liberals, including our own member Dr. Gershaw, five U. F. A. members and two Independents voted with the government.

The vote may also be taken as an indication that the government placed the railway conditions before the house in a fair and convincing manner.

That fourteen members of the opposition were big enough to forget party and assist rather than embarrass the government in this important matter, is also a healthy sign, and to none is more credit due than to our own member, Dr. Gershaw.

## A SHORT WAY OUT

At a meeting of the Calgary U. F. A. local last week-end, H.

Stutbury, trade commissioner for this province, presented a letter which brought out some startling facts. Mr. Stutbury suggested that the U. F. A. might do a marvelous work in the study of the whole matter of industrialization of agriculture.

In this connection he stated that Idaho potatoes are sold in Toronto; that we imported into Canada last year over 25,000,000 pounds of seed, 18,000,000 of clover grass and timothy; that we imported into this province 100 cars of condensed milk more than half of which was sold to farmers; that we brought into this province almost a million dollars worth of canned vegetables and that our two canning factories worked only a very short period because they could not get raw supplies, that no soy beans are grown in this province and this bean has become the third greatest crop in the United States.

These are startling revelations to be made in connection with one of our main industries and justified Mr. Stutbury in remarking "I think that a study of industrialized agriculture might point a short way out of some of the many of our present difficulties."

## ABOUT INFLATION

Periodically these days we hear and read of different individuals and organizations advocating inflation of our currency as a means of improving present conditions and as a step towards relieving certain branches of our business activities.

Dealing with this question in "Canadian Business" for March Humbley White goes into the whole question very thoroughly to show that inflation in Canada at this time would be unwise. A recapitulation of Mr. White's arguments shows that inflation would be of no lasting advantage to exporters or producers depending on export markets; it would place an impossible burden on the payment of obligations abroad; inflation cannot be controlled; its disastrous consequences fall most heavily on the plain-living people who are powerless to protect themselves; inflation is an unfair imposition upon creditors and security holders; it leads to "thrifting becoming the quality of fools; inflation leads to business chaos at a time when stability is most required; it results in the flight of capital, foreign exchange speculation with all its evil effects and in a staggering blow to domestic and foreign confidence in the country which adopts it.

## Redcliff Reminiscences

Taken From Our File of March 27th, 1924

At the council meeting on Monday last a petition from the merchants, asking that a by-law be passed compelling law stores to close at 6:30, was discussed.

The prospects for building a number of dwelling houses both for rent and sale here this summer, are most promising.

Burns & Hollinger intend building ten houses in Arlington. There will be twelve houses built in River View Park and four in Phoenix.

A new Rosery will be built in Redcliff by Mr. D. McAllister, of Calgary.

Redcliff has been besieged with visitors all this week. Besides the number coming in on the trains, the fine weather has made it possible for many more to come in by auto. No doubt Redcliff's name has become

known far and wide because of its rapid growth and because it is now looked upon as the coming manufacturing centre of the west.

Redcliff will celebrate its fourth birthday on April 21st, and no town in Canada has ever had greater cause for rejoicing on its anniversary. In the last two years the town has grown from 800 to 3000. The number of factories has increased from two to eleven, with three in the process of construction and six more under contract to build this year. Over six hundred business blocks and residences have been built. The industries furnish employment to approximately 1000 men. There are six gas wells and the production of gas is approximately 1,500,000 feet per day. This is surely a fine record. How
